layers are separated by a distance of no more than the size of at least one particle of said particles.

Please add new claim 20 as follows:

C2

1-20. A multilayer ceramic capacitor comprising:
internal electrode layers; and
dielectric layers, the dielectric layers comprising particles, wherein an average
particle diameter (R), in a direction parallel with said internal electrode layers, is larger than a
thickness (d) of said dielectric layer, wherein a ratio (R/d) between said average particle
diameter (R) and the thickness (d) of said dielectric layer satisfies $1 < R/d < 3$, and wherein the
internal electrode layers are separated by a distance of no more than the size of at least one
particle of said particles.--

REMARKS

Claims 1, 3, 5, 10, 12, 14 and 16-20 are pending. By this Amendment, claim 1 is amended; claims 4, 6, 8, 9, 11, 13 and 15 are canceled; and claim 20 is added.
